

The Roll Up is great for trade shows, promotional events or any instance that requires a permanent banner display. The banner graphics are 33"W x 78"H and will surely capture attention. The display is ready to use out of the box, just flip out the feet, raise the pole, and roll out the banner.

For tear down, the banner "rolls up" into the base for storage. This protects it from wear and tear and minimizes space during transportation or shipment.

The display is constructed from aluminum with a silver, natural anodized finish. The elegant carrying case (with shoulder strap) is included with every order.
